**Thesis Project** : Design and implementation of a telesales order taking process as part of the Inwi Telecom project (Morocco), on Salesforce CRM.

### • Bachelor's Degree in Computer Science: 2022

#### University of Mouloud Mammeri, Tizi-ouzou

**Final Year Project** : design and implmentation of an e-commerce website for the sale of books.

### • High School Diploma (Experimental Sciences): 2018

lycée Nouvelle Ville Tizi-ouzou/1109 Mention: Quite Good

## PROFESSIONNEL EXPERIENCES

### Salesforce CRM / DevOps Developer - Inwi Telecom Project Since July 2024 Assa-Associates Algeria

#### Salesforce Development & Customization:

- Designed and implemented advanced features using Salesforce technologies such as Apex, Lightning Web Components, Data mappers, and OmniStudio.
- Deployed solutions across multiple Salesforce environments (Dev, DevProd, UATeVol, PreProd, Prod) using tools like Workbench.
- Wrote detailed test cases to ensure full coverage of business scenarios.
- Performed unit testing to validate code reliability and conducted end-to-end testing to maintain system integrity.
- Actively participated in Scrum meetings and daily standups to support accurate project tracking and timely delivery.
- Proposed and implemented innovative solutions for performance and efficiency improvements.

### Salesforce CRM Developer Internship From February 2024 to June 2024 Assa-Associates Algeria

- Completed Salesforce Trailhead training on Lightning Experience, LWC, Apex, and OmniStudio.
- Prepared for OmniStudio Developer & Platform App Builder certifications.
- Assisted with environment setup and learned the basics of multi-environment deployment and version control.

### Full Stack Developer | team Leader Since January 2022, Freelance

**Stack:** MERN (MongoDB, Express.js, React, Node.js, Java, Spring boot, Postgresql, SqlLite3, Docker.

- Led the design, development, and deployment of several full-stack web applications across industries (restaurant, real estate, inventory, admin services, messaging).
- Managed both frontend and backend architectures using technologies such as React, Node.js, Java (Spring Boot), PostgreSQL, SQLite, Docker, and the MERN stack.
- Developed REST APIs and ensured smooth integrations between client and server components.
- Configured and managed local deployments using Docker for self-hosted solutions.
- Integrated hardware communication (e.g., IP-based receipt printers) in POS systems.
- Designed intuitive user interfaces and responsive layouts with Tailwind CSS and Bootstrap.
- Led Agile teams through all development phases: planning, task delegation, code reviews, testing, and deployment.
- Maintained clear project documentation, tracked progress, and ensured on-time delivery.
- Facilitated regular team stand-ups, communicated with stakeholders, and proposed performance optimizations.
- More details and project demos are available on my portfolio.
